

ABOUT COMPANY

Passion | Innovation | Transformation

Experience and enjoy the power of "right" solution!

Product Development
Technology Consulting
IT Staffing & Support

Founded in 2009 by a group of IT professionals with rich and diverse experience in Indian, UAE & US Corporate sectors, ebaConnect, a young professionally managed start-up company, commits to cater truly integrated, best of the breed, state of the art, affordable and scalable enterprise business application packages, primarily for small to medium sized organization's IT needs.

By virtue of our continuous urge for extensive research coupled with technology improvisation and implementation of best practices, we strive to compete and excel in promising and producing future proof solutions that will trigger customer ecstasy - the 'WOW' factor. With an eagle's eye for details and perfection, we at ebaConnect, have gained expertise in building a world class product development framework, iConnect, which can be used as an accelerator to jump start application development, be it for a be-spoke project or an enterprise product from ground-up, across diverse industries.

PRODUCT DEVELOPMENT | TECHNOLOGY CONSULTING | IT STAFFING & SUPPORT

Our robust systems and processes are adaptable to the needs of your business and we can help create a unique customized solution with this rapid enterprise application development framework which is comprehensively packed to provide rich UI and user experience along with reusable industry starter solutions. Leveraging the use of state-of-the-art technology and cost-effective methods, our "Customer Focus" attitude and approach ensures to protect your strategic IT investments by providing sustainable competitive advantage in the market along with high return on investment.

Dedicated to quality and technological innovation, our enthusiastic and experienced staff is keen, to collaborate with clients to help them achieve higher standards of productivity and efficiency. This product oriented company is backed by an integrated team of experienced management, software consultants, senior architects, creative designers and professional SME's, .

Our core capabilities lie in understanding and developing user friendly & value for money applications to ensure guaranteed customer satisfaction with quality by

- Implementation of innovative software solutions and ideas
- Providing best-in-class web design & development packages and services
- Leveraging cutting edge technologies, best practices and value added consultation
- Delivering values and promises at every stage from feasibility study to post deployment with same level of commitment, responsiveness and professionalism
- Collaborate to implement continuous process improvements by listening to regular feedbacks and surveys.

Our professionals are highly proficient in Microsoft and Java technology stack delivering high quality cutting-edge software products to our clients. With our extensive R&D, the resources are crafted carefully with a rich domain centric exposure in core enterprise application building blocks and thereby enriched to provide optimized solutions for desktop, portal and mobile applications which includes all facets of a product life cycle be it conceptualization, design, prototyping, development, testing methodologies, UI & UX, implementation, enhancements, new product releases, maintenance and support.

Our rapid prototyping of solutions assist in delivering your needs and requests promptly. We minimize project overheads through efficient processing methods and product development framework and we bet to consistently exceed customer expectations. We provide you with turnkey solutions that take into account your current business situation and environment as well as your likely future needs. While we engage in any customized application development solution, we will be glad to extend our propriety framework libraries for rapid prototyping and deployment free of cost with extended training and support.

The fundamental underlying philosophy of our framework is based on having a pre-built rapid development-to-deployment environment, eliminate licensing/cost overhead and leveraging the fusion of feature rich Primefaces/DevExpress/Microsoft UI experience coupled with proven and robust open source Java platform for independent hosting. What this typically translates to our customers is that we ensure they get best of both worlds with a huge strategic leap on their IT schedule and investment.

CHALLENGES ADDRESSED

- Re-inventing the wheel coupled with steep learning curves
- Architectural bottlenecks with performance/scalability issues and non reusable components.
- Complexity and inflexibility with lower degree of customization and configuration
- Fear or past implementation failures & absence of competitive advantage.
- Ground up or scratch development to deployment effort for every project/product undertaken
- Cost, time over-runs with deployment uncertainty

VALUE PROPOSITION

- 100 % R&D intrinsic state-of-the-art pre-built architecture and framework provided as part of the package
- Customization at reasonable charges.
- Plug & play container driven framework for adding any bolt-on modules or functionality
- Core prebuilt ERP components / starter kit to be provided without any additional charges
- Free upgrades and updates for using our iConnect/READ framework
- Rapid prototyping for visual experience on Day 1

TECHNOLOGY @ WORK - CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

We know what it takes to successfully build an enterprise business application that involves innovation, creativity, vision and engineering discipline. While visual aesthetics and design needs to be picture perfect, we passionately commit ourselves to basic engineering ground rules – that application development can neither be 'under' nor 'over-engineered'. Our service offerings not only utilize our in-depth knowledge and methodology used in our underlying framework, but we ensure that our 360-degree focus is applied on every task necessary to ensure that our clients achieve the most business benefits possible from their IT investments.

Having years of expertise in building enterprise and consumer software – succeeding in many cases and failing in a few – we've evolved a rapid enterprise development framework with product class approach, that we are passionate about, and we have christened this producteering marvel as "iConnect". The four key tenets applied are: Principles, Practices, People and Platforms. Every customer will be able to visualize and connect with this approach of ours to be very relevant and useful to them.

iConnect the flagship product of ebaConnect is a one stop comprehensive, integrated enterprise suite that covers all facets of an organization's requirement, spanning from intradepartmental functions to brand building. iConnect will be a media to connect, communicate and collaborate all stakeholders of an organization using the proven 'READ' framework.

Designed on a cutting edge hybrid platform with a unique combination of feature rich online web portal along with an efficient windows desktop based application development framework, the solution has the power to revolutionize the way IT organizations are run. It not only addresses the current requirements, but it is also very futuristic by design.

The underlying framework has been conceived with the following design considerations to produce the 'WOW' factor to trigger customer ecstasy

TECHNOLOGY @ WORK - CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

- Jump-start your product development framework and save 30% of the time and cost on day one. The essential plumbing layer will be handled by us and customers need not worry about figuring the right choices and incorporation of best practices
- Rapid prototyping and building wire-frames to bring visual experience on Day 1 and experience a "World Class" UI due to pre-built component libraries. Fusion of interactive rich UI (Microsoft / DevExpress / PrimeFaces) and robust back end components (Java/J2EE), coupled with zero licensing deployment costs
- Transform Application Development to build product or projects by bringing in "product class" approach right at the beginning. (Robustness, Scalability, Performance) by extensively reusing our product development framework iConnect/ "READ" framework(Rapid Enterprise Application Development) to crash your time-to-market
- With an existing architecture that is proven, it reduces the load on an architect; developers also benefit by looking at the best practices implemented throughout and can adhere to the same while implementing the product/project functionality. It will have quite a few critical design decisions built in, that can help developers jump start their application development efforts on the right platform.
- Designed to be an n-tier SOA architecture model, the choice of tools/components choices is carefully calibrated to address appropriate usage of integration & Application layers by bringing in the best practices in design and development.
- Identify time-consuming tasks in product development and focus on Reducing the amount of time spent on these tasks. Help the team focus on business value of the software rather than engineering tasks
- Can also target at being utilized/implemented as a ready-made mini ERP with core optional core modules inbuilt. For example, Payroll, Finance (Account

PRODUCT HIGHLIGHTS

Generic role based access controls Core ERP components with Starter kits Pre-built architectural plumbing framework Easily configurable & customizable solutions Zero Licensing cost for standard applications.

Highly intuitive propriety customizable workflows Essential basic application development structures Cutting Edge Technology with futuristic/s UI and UX Extensive Reusable component libraries to Jumpstart 30% Jumpstart on day 1 - Rapid Prototyping framework

TECHNOLOGY SPECS

Visual Experience on Day 1 – Rapid Prototyping Product Class Approach – Eliminate surprises/risks Extensive Reusable framework – Crash Time to Market Pre-built core ERP and application development components Carefully crafted components-Zero licensing deployment costs Hybrid Fusion of Microsoft/DevExpress/Java--Minimize IT investments

TECHNOLOGY SPECS

- Ubuntu/Linux/MySQL
- Microsoft /DevExpress /Primefaces
- Java/J2EE/Spring/iBatis/Spring/J2ME
- Loosely coupled Plug 'N' Play SOA architecture
- Platform independent & Hassle free Deployment
- Fusion of hybrid Web & Rich UI Desktop Solutions
- Robust, Flexible, Scalable, Secure and Light Weight

SERVICE OFFERINGS

- Product Development
- Technology Consulting
- IT Staffing & Support Solutions
- Rapid Application Development
- Enterprise Application Management Services
- Microsoft/DevExpress and Java based solutions
- Desktop/Portal/Mobile Solutions or hybrid combinations

Rapid Enterprise Application Development (READ) Framework

Mini ERP Components

Payroll | Financial Accounting | Fixed Asset Accounting | Cost Accounting | Budget Accounting

Production | Inventory | HRMS | Procure 2 Pay and Order to Cash | DMS

Enterprise Application Reusable Components

BPM/Workflow | UI Controls | Admin Data Management | Inbuild Collaborative Communication (email, SMS, Fax, Mobile, same-time, Doc Mgmt)

Integration Components | Notification Messaging and Queuing | Single Sign on Security & Authentication

Basic Functionality

Application Monitoring | Runtime Customization Forms Reports Queries | Scheduler and Batch Processing | File Portability-Excel, PDF, Html, Word, XML, CSV, Text, email

Custom Fields and runtime customization | Role Based Access Control - RBAC | Configurable UI with drill down graphical reports

Essential Plumbing Layer

Cache | Exception Handling | Logging | Resource Message Handling

Auditing | Native / Adaptive Adapters | Data Access Synchronization

Microsoft / DevExpress | Technology Stack | Java/J2EE/PrimeFaces

Our Esteemed Clients

Countries Implemented

UAE, KSA, Oman, Nigeria, Ghana, Benin, IVC. Indonesia and India

iHCM

A Complete "Recruit to Retire" HCM solution for small to large sized organizations, which integrates and automates the entire HR workforce management into a One stop business information platform across multiple geographies.

(Organization management, Employee Profile Management, Personnel Actions, ESS/MSS, Time & Leave Management, Recruitment, Appraisal & Compensation Management, Periodic Payroll Process, General Ledger Posting, Payment & Bank Transfer, Statutory Payments & Statement, End of Service Processes)

iCore ERP

A highly innovative next generation complete ERP/HCM/CRM suite, primarily targeting the SMB (Small to Medium Business) sector, is extremely easy to use and visually compelling. Most of the features and business processes range from simple clicks to drag and drop.

- Inventory & Warehouse Management (Items Master & BOM, Receipt & Inspection, Issue & Transfer, Serial & Batch Management, Bin & Rack Management)
- Order to Cash(Estimate, Order Management, Pre-sales Activity, Invoice & Delivery, Receipts, Returns, Multi Price Lists, Sales Planning & Target)
- Procure to Pay (Indent & Purchase Requisition, Purchase Order Management, Good Receipts/Inspection Process, Invoicing & Payments)
- Financial Operations(Chart of Accounts, Day to Day financial operational Postings, Open Item Management, Auto Maintenance of Sub Ledger postings, Bank reconciliations, Periodic Book closure functions, General Ledger, AR/AP, Cost Accounting, Tax Accounting, Banking, Fixed Asset Accounting, Budget Planning & Control)
- CRM(Lead, Opportunities & Activities Management, Opportunity Analysis Reports, Opportunities Pipeline)
- Service Modules, Plant & Equipment/Asset Maintenance Management

iDox - Document Management System

iDox offers a document management system that manages the documents and business information for existing process. it is built on a stable and robust .NET framework 4.0 with C# as the programming language and MySQL Database. our DMS captures and stores electronic and scanned paper documents into a centralized system that allows documents to be easily recovered, reviewed, modified and acted upon. Documents may include Word files, AcMrobat PDF's, spreadsheets, faxes and email.

OUR PRODUCTS

'Next Generation' ERP/HCM/CRM
Product Development Framework

A Complete HCM solution for
small to large sized organizations
